MSF Office

Head Community Health Educators

Dear **MSF Office**:

I am interested in working as a health educator for your Médecins Sans Frontières (MSF), an organization whose community work I have been following for time to now. Impressed with the way that your organization runs, so I offered the enclosed resume for your perusal.

Having recently obtained good experience in community health, I am raring to apply my skills in this regard. Since I have held several volunteer positions of similar type, in different places, I am somewhat well-acquainted with implementing and managing health education strategies, interventions, and programs.

Because my interest in this work is so profound, I will be an immediate contributor to your organization, allowing me to serve as a health education resource for your organization.

Also, my deep and inherent interest in planning and implementing programs and the activities I conducted during my studies, will make me an excellent individual to hire at MSF.

I am quite confident that once you and I have met in person, you will not disagree with any of my claims regarding my suitability for an entry-level health educator position at your facility.

Thank you for your time and consideration.

Sincerely,

Hadeel Jameel Salem ail.
